These products meet most national building codes for Emergency Escape & Rescue Opening requirements. Please check your local codes to confirm that these are applicable. Other requirements may also apply.

NOTES:

- The side jamb of sliders extend above the head jamb; additional space for the rough opening height may be necessary.
- Some installation procedures will require larger rough openings than noted (i.e. installations using our installation clips), therefore, the rough opening sizes may need to be increased accordingly. Rough opening gaps may be increased up to a maximum of 1/2" on all sides and still be within good practice guidelines.
- ULTRA SERIES FRAME SIZES** are for units without brickmould. For unit dimensions with common exterior trim options:
 - 1 15/16" brickmould, frame size to unit dimension: +2 5/8" width +1 15/16" height
 - 3 1/2" flat or profiled casing, frame size to unit dimension: +5 1/2" width +3 3/8" height
 - 3 1/2" casing with backband, frame size to unit dimension: +7" width +4 11/16" height
- HERITAGE SERIES UNIT DIMENSIONS** are for units with standard 1 15/16" brickmould. For frame sizes with other common exterior trim options:
 - 1 15/16" brickmould, unit dimension to frame size: -2 3/8" width -1 11/16" height
 - 3 1/2" flat or profiled casing, unit dimension to frame size: -5 1/2" width -3 1/4" height
 - 3 1/2" casing with backband, unit dimension to frame size: -7" width -4 3/16" height
- Grilles are optional. Follow chart down from top row and across from left column to determine grille configurations.
- All measurements are nominal. These elevation charts are not to scale.
