

Installation & Maintenance

Kolbe® windows & doors manufactures windows to the highest quality standards. Proper installation and periodic maintenance is essential for sustaining this quality. Installation instructions provided with our products include information on installing units in traditional wood framing or concrete masonry walls lined with 1-1/2" (38mm) thick wood buck. Techniques covered in these instructions include utilizing Kolbe installation clips and screwing through the frame. Sole responsibility for choosing the method of installation is applied to the architect, engineer, building owner, contractor and/or homeowner. Failure to install and maintain Kolbe products according to the installation instructions provided will void any warranty, written or implied.

Wall Construction

Kolbe windows & doors is not responsible for the design, performance or construction of the walls or roof beyond the perimeter of the window or door. Proper integration with the weather barrier of the wall and/or roofing system is the sole responsibility of others.
